

## Year 10 Term: 2

### Commodity: Milk, cheese and yoghurt

#### KEY POINTS TO COVER PER COMMODITY

| KEY TERMS   | APPLICATION OF KEY TERMS  |
|---|---|
| Provenance  | <ul style="list-style-type: none"><li>• <b>Debate</b> local versus nationally distributed and also imported</li><li>• Bring in cost and impact on milk prices for farmers livelihood Link in food miles, why consumers may chose organic</li><li>• Food wastage and sustainability</li></ul>  |
| How commodity is grown/reared and processed   | <ul style="list-style-type: none"><li>• <b>Discuss</b> how animals are reared, fed and milked</li><li>• <b>List</b> animal sources of milk</li><li>• <b>Research and discuss</b> different methods of preserving milk (drying, UHT, pasteurisation, etc.) –link to convenience foods</li><li>• <b>Discuss</b> the importance of hygiene for effective food safety (heat treatment)</li><li>• <b>Explain</b> the effect on nutritional content from processing</li><li>• <b>Define and discuss</b> 'Secondary processing' – milk to cream, yoghurt, cheese, etc.</li></ul> |
| Classification  | <ul style="list-style-type: none"><li>• Different animal sources (also link in non-dairy milk – e.g. nut, soya, coconut; alternatives to non-dairy cream)</li></ul> <p>Link secondary processing – to cream, yoghurt, cheese, etc.</p> <ul style="list-style-type: none"><li>• Different types of milk – skimmed, semi-skimmed, etc.</li><li>• Different types of cream – whipping, soured, etc. (link to fat content)</li><li>• Different types of cheese – hard, soft, etc. (link to fat content)</li></ul>   |
| Nutritional values (include sources, functions, deficiencies, excess, daily requirements) | <ul style="list-style-type: none"><li>• Nutrient requirements (linked to different life stages)</li><li>• Protein – HBV and discuss amino acids</li><li>• Fats – saturated</li></ul>  |

|  |   |
|--|---|
|  | <ul style="list-style-type: none"> <li>Recap on vitamins and minerals (cover vitamins A and D and calcium), and include complementary actions of the nutrients vitamin D and calcium Fat soluble vitamins A and D Trace element – iodine Effect on nutritional content from processes</li> </ul>  |
| <b>Dietary considerations</b>                  | <p>Link to bone health: Calcium and vitamin D</p> <p>Link to allergies: Lactose intolerance from cow milk (why?) What are the alternatives?</p> <p>Link to heart health: Fat content and type</p>   |
| <b>Food science</b>                            | <p>Chemical and physical structure of dairy based products</p> <ul style="list-style-type: none"> <li><b>Emulsion</b> – explain why milk is an emulsion <b>Denaturation and coagulation</b> of milk proteins Making cream, butter, yoghurt – the science behind it</li> <li>Making cheese – use of <b>rennet</b> (curds and whey). <b>Benefits of bacteria</b> in the making of yoghurt, cheese, etc.</li> <li>Effect of heat on cheese</li> </ul>  |
| <b>NEA Assessment 1 practise investigation</b> | <ul style="list-style-type: none"> <li><b>Demonstrate and explain</b> how an emulsion is formed when making butter.</li> <li><b>Explain the changes</b> that take place in milk when it is heated.</li> <li>Make yoghurt and <b>explain the food science</b> behind it.</li> <li>Make cheese and explain the food science behind it.</li> <li>Why is UHT milk slightly less white?</li> <li>Compare the flavour of UHT milk with fresh milk and discuss (tasting milk products sensory analysis)</li> </ul> |
| <b>Food hygiene and safety</b>                 | <ul style="list-style-type: none"> <li>Concept of high risk foods (dairy being a category)</li> </ul>   |

|                |  |
|----------------|--|
|                | <ul style="list-style-type: none"> <li>• How bacteria multiplies How to avoid cross-contamination</li> <li>• Why heat treating raw milk is important – link to food science</li> <li>• How should dairy based products be stored? Temperatures?</li> </ul> |
| <b>Storage</b> | <p>Link to dried, cartons, unopened and opened cans, fresh, frozen, etc.</p> <p><b>What are suitable conditions for storage? Why?</b></p>  |

**Tips:** Don't forget that the KEY TERMS are always the same when it comes to COMMODITY. It is the actual commodity that is different.

### **TEST YOURSELF**

**You should be able to recall and comfortably discuss each KEY TERM above. You should be able to apply each KEY TERM to any COMMODITY.**

- Can you define all of the COMMODITY groups (*list them*)?
- How many COMMODITY groups are there (*state*)?
- Can you link back each COMMODITY to the EAT WELL GUIDE (*Research, mind map and describe*)?
