

Sources of Finance	Sources of Finance	Revenue and Costs									
<p>Ways in which businesses access finance to pay for assets and running costs.</p> <p>Own Funds: Using money the owner has saved. + <i>No cost to the finance / - Risk</i></p> <p>Family and Friends: Borrowing from friends and family is a popular source of external finance for many new entrepreneurs. + <i>Flexible repayments / - Can cause family arguments</i></p> <p>Additional Partners: Adding an additional partner to the business who will be required to invest. + <i>Shared liability / - Dilutes ownership</i></p> <p>Reinvesting Profits: Using profit earned from the previous year. + <i>No cost (i.e. Interest) / - Upset shareholders</i></p> <p>Sale of Assets: Selling assets that are no longer needed. + <i>Reduce wastage / - Can't produce as much</i></p> <p>Share Issue (PLCs): Selling shares to investors on the Stock Exchange. + <i>Quick investment / - Risk of takeover</i></p> <p>Bank Loan: Borrowing a lump sum of money from the bank. + <i>Flexible how used / - Interest to be paid</i></p> <p>Overdraft: Where a bank allows a firm to take out more money than it has in its bank account. + <i>Easy to arrange / - Interest usually high</i></p> <p>Hire Purchase: When a business pays for assets in monthly instalments, until paid in full. + <i>Reduces cash flow issues of a large purchase / - Pay more for the asset than it is worth</i></p>	<p>Leasing: When a business ‘rents’ equipment. + <i>Reduces cash flow issues of a large purchase / - Never own the asset - hired</i></p> <p>Trade Credit: Delaying payments to suppliers / business that money is owed. + <i>Delay payments – good for cash flow / - Reliant on a good relationship with suppliers</i></p> <p>Venture Capital: An investor who offers finance and expertise in return for a share of the business. + <i>Expertise as well as finance / - Lose control</i></p> <p>Business Angels: Business angels are similar to venture capitalists, however, they focus on new businesses and take more of an advisory role. + <i>Receive constant advice / - can cause disagreements</i></p> <p>Government Grants: Money given to businesses for specific purposes e.g. for setting up in a deprived area. + <i>No need to repay / - Lots of paperwork</i></p> <p><i>Key Terms</i> Cost: Does interest need to be paid? Capital: Another word for equipment Long Term: Paid over more than one year Short Term: Paid in under a year Liability: Responsibility for the debt Internal sources – internal sources are sources of money from within the business, from the owner, or from previous business income (earned through profit) External sources – external sources are sources of money from outside the business, from other people putting money into the business.</p>	Key Term	Definition/Formula								
		<i>Revenue</i>	is the money or income a business receives from selling its products or services.								
		<i>Revenue</i>	number of products sold x price of product								
		<i>Costs</i>	This is the money that businesses spend to operate the business. A business will have many costs to pay in order to run the business.								
		<i>Fixed Costs</i>	costs that do not change with an increase or a decrease in the amount of goods or services produced or sold								
		<i>Variable Costs</i>	costs that vary with the level of output.								
		<i>Total Costs</i>	fixed costs + Variable costs								
		<i>Profit/Loss</i>	revenue > costs equals profit revenue < costs equals loss								
		<i>Profit/Loss</i>	revenue – total costs								
Break-Even	Cash Flow	Profit and Loss									
<p>This is the point at which the business makes neither a profit nor a loss.</p> <p>Total Revenue = Total Cost</p> <p>Breakeven = Fixed Costs / (Selling Price – Variable Cost)</p> 	<p>Cash Flow Forecast: shows the prediction of the flow of cash (money), in and out of a business, by comparing inflows and outflows.</p> <p>NET CASH FLOW = INFLOWS – OUTFLOWS</p> <p>OPENING BALANCE</p> <p>CASH INFLOWS CASH OUTFLOWS NET CASH FLOW</p> <p>CLOSING BALANCE</p> <p>Opening balance: The money available at the beginning of the month (The closing balance of the previous month). Cash Inflows: cash flowing into the business (revenue, loan, selling assets) Cash Outflows: cash flowing out of the business (wages, materials, electricity) Net cash flow = Total Revenue – Total Expenses. Closing balance The money available at the end of the month. Calculation = Net Cash Flow + Opening Balance</p> <p>Ways to Improve Cash Flow...</p> <table><tr><td>Increasing Revenue:</td><td>Reducing Outflow:</td></tr><tr><td><ul style="list-style-type: none">- Increase Price- Reduce Price- Advertise- Etc...</td><td><ul style="list-style-type: none">- New Suppliers- New premises- Reduce wages- Etc...</td></tr></table>	Increasing Revenue:	Reducing Outflow:	<ul style="list-style-type: none">- Increase Price- Reduce Price- Advertise- Etc...	<ul style="list-style-type: none">- New Suppliers- New premises- Reduce wages- Etc...	<p>Profit and Loss: shows the annual (yearly) levels of profit or loss.</p> <p>Revenue: Money that comes into the business through sales - AKA: Income, Sales Revenue, Turnover</p> <p>Cost of Sales: Costs directly linked to the production of products e.g. Raw Materials.</p> <p>Expenses: Costs that are indirectly linked to the production of products. e.g. Rent, salaries, petrol.</p> <p>Gross Profit: The amount of revenue that is left, once cost of sales have been taken into account.</p> <p>GROSS PROFIT = Revenue – Cost of Sales</p> <p>Gross % Profit: The % of revenue that is gross profit. E.g. 25%, would mean that 25p of every £1 of sales revenue would be GROSS PROFIT.</p> <p>GROSS % PROFIT = $\frac{\text{Gross Profit}}{\text{Revenue}} \times 100$</p> <p>Net Profit: The amount of revenue that is left, once <u>all</u> costs and expenses have been taken into account.</p> <p>NET PROFIT = Gross Profit - Expenses</p> <p>Net % Profit: The % of revenue that is gross profit. E.g. 10%, would mean that 10p of every £1 of sales revenue would be NET PROFIT.</p> <p>NET % PROFIT = $\frac{\text{Net Profit}}{\text{Revenue}} \times 100$</p> <table><tr><th colspan="2">Improving Profitability</th></tr><tr><td>Increase revenue:<ul style="list-style-type: none">• Increase price• Reduce price• Increase quality• Sell in more countries• Extend product range</td><td>Reduce costs:<ul style="list-style-type: none">• Cheaper suppliers• Change location• Reduce salaries• Reduce amount of workers</td></tr></table>		Improving Profitability		Increase revenue: <ul style="list-style-type: none">• Increase price• Reduce price• Increase quality• Sell in more countries• Extend product range	Reduce costs: <ul style="list-style-type: none">• Cheaper suppliers• Change location• Reduce salaries• Reduce amount of workers
