

Promotion

Why might a business charge higher prices?

- **Higher costs** / better ingredients / higher rent / cost plus
- **Wants more exclusive market** / customers willing to pay higher price
- **May be well known** / quality brand → people willing to pay higher prices
- **High marketing costs** → need to be regained from sale of product

Advantages of using pricing strategies to maintain the sales of their products

- Right strategy will increase sales → increase revenue → profits will rise
- Prices can be applied to specific niche → market segment
- Prices can reflect the market for the product → skimming may work in some markets i.e. high income and penetration in others
- Prices can take into account actions of competitors → stopping switching etc.

Disadvantages of using pricing strategies to maintain the sales of their products

- Competitors may follow pricing strategy → so no effect → no increase in sales
- Competitors may not follow pricing strategy → customers not attracted
- Need for expensive advertising to promote pricing strategy → so profits not as expected
- Some segments may not be happy with pricing strategy → allowing less well off to afford expensive products
